

ACVATIX

## Electromotoric actuators for valves

SAS..

### Electromotoric actuators with 5.5 mm stroke and 400 N positioning force

- SAS31.. Operating voltage AC 230 V, 3-position control signal
- SAS61.. Operating voltage AC 24 V / DC 24 V, positioning signal DC 0...10 V / DC 4...20 mA / 0...1000  $\Omega$
- SAS61../MO operating voltage AC 24 V / DC 24 V,  RS485 for Modbus RTU communication
- SAS81.. Operating voltage AC/DC 24 V, 3-position control signal
- For direct mounting on valves; no adjustments required
- Manual adjuster, position and status indication (LED)
- Optional function extension with auxiliary switch

## Application

To operate Siemens 2-port and 3-port valves:

- Types V..G44.., VVG55.., and VVG549..
- 5.5 mm stroke

Used as control and shutoff valves in heating and ventilation plants.

Together with the ASK30 mounting kit, all former Landis & Gyr valves with 4 mm or 5.5 mm stroke can also be operated: X3i.., VVG45.., VXG45.., VXG46.., VVI51...

## Functions

Function	Description	Type
3-position control	A 3-position signal controls the actuator via connection terminals Y1 or Y2. The desired position is transmitted to the valve.	SAS31.. SAS81..
Modulating control	The positioning signal range (DC 0...10 V / DC 4...20 mA / 0...1000 Ω) corresponds to the positioning range (closed...open, or 0...100% stroke) in a linear manner.	SAS61..
Positioning signal and characteristic changeover	Setting with DIL switch. Factory setting SAS...: <ul style="list-style-type: none"> <li>• Characteristic curve: log = Equal percentage (switch set to Off)</li> <li>• Positioning signal: DC 0...10 V (switch set to Off)</li> </ul>	
Position feedback U	Signal returned to acquire the position via input.	
Forced control (Z-mode)	Forced control helps override automatic mode and is implemented via higher control.	
Calibration	Carry out during initial commissioning. The actuator drives to the top or bottom end position; the measured values are saved.	SAS61.. SAS61../MO
Valve seat detection	The actuators have power-dependent seat detection. After calibration, the exact valve stroke is stored in the actuator's memory.	
Foreign body detection	After clogging is detected, three attempts are made to get past clogging. If unsuccessful, the actuator continues to following the positioning signal only within a limited range, and the LED flashes red.	
Modbus RTU (RS-485), not galvanically isolated	Setpoint 0..100% valve position Actual value 0..100% for valve position Override control Open / Close / Min / Max / Stop Setpoint monitoring and backup mode	SAS61../MO

## Types

<sup>1)</sup> Not designed for continuous operation

<sup>5)</sup> Approbation: CE, UL

<sup>2)</sup> Cable gland: M16, M20 (ISO50262)

<sup>6)</sup> Second value: Power consumption in normal position

<sup>3)</sup> Cable gland ½" (UL514C)

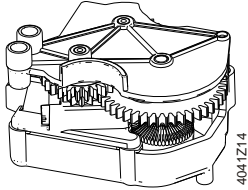

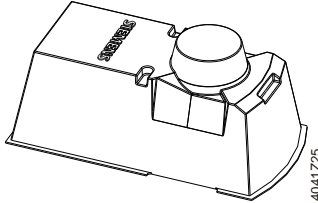

<sup>7)</sup> Spring return time at low temperatures slightly longer

<sup>4)</sup> Approbation: CE

<sup>8)</sup> Fixed connection cable 5 x 0.75 mm<sup>2</sup>

### Delivery

Actuators, valves, and accessories are supplied in individual packs.

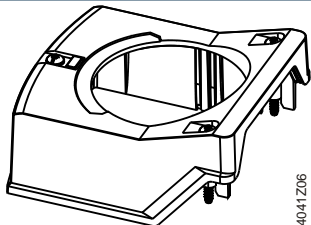

Electrical accessories	Mechanical accessory
Auxiliary switch ASC10.51 	Weather shield <sup>1)</sup> ASK39.2 

1) SAS61../MO is not intended for outdoor use

**Ordering (example)**

Type	Stock number	Designation	Number of pieces
SAS31.00	S55158-A106	Actuator	1
+ auxiliary components such as connections, aux switches, etc.			

**Spare parts**

Stock number	Description	
S55845-Z180	Type ASQ1: Housing cover with associated screws and light guide as component, without laser labeling	

**Compatibility**

## Notes

### Safety

 <b>CAUTION</b>	
	<p><b>National safety regulations</b></p> <p>Failure to comply with national safety regulations may result in personal injury and property damage.</p> <ul style="list-style-type: none"> <li>Observe national provisions and comply with the appropriate safety regulations.</li> </ul>

### Engineering

#### **SAS31.. and SAS81..**

3-position actuators must have their own specific controller, see "Connection Diagrams".

#### **SAS61..**

Up to 10 actuators can drive in parallel on a controller output with a rating of 1 mA. Modulating actuators have an input impedance of 100 kΩ.

#### **SAS61../MO**

The Modbus converter is dimensioned for analog control at 0..10 V.

Note: Keep the analog signal setting on the actuator as is (switch 1 to Off); adjustment not possible.

The actuators are parameterized at the factory to an equal-percentage characteristic; this corresponds to their use with valves VVG/VXG44.

When using SAS61.03/MO with valve series VVG549, the following must be set:

- Actuator: DIL switch (internal actuator characteristic changeover) to linear (switch 2 to On).
- Modbus register 263: Set "Y\_U\_Characteristic" to "0 = linear".

**Mounting positions**

- 1) Only together with weather shield ASK39.2. IP54 housing protection unchanged.
- 2) SAS61../MO is not intended for outdoor use.

**Maintenance**

The SAS.. actuators are maintenance-free.

Mounting:

- Do not touch the valve coupling if the components (valve/pipes) are hot
- If necessary, disconnect electrical connections from the terminals

The actuator must be correctly fitted to the valve before recommissioning.

**Disposal**

**⚠ WARNING**

**Tensioned return spring**

Opening the drive housing can release the highly tensioned return spring, possibly resulting in injury due to flying parts.

- Do not open the drive housing.

The device is considered an electronic device for disposal in accordance with European guidelines and may not be disposed of as domestic waste.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

## Warranty

The application-specific technical data is guaranteed only in combination with the Siemens products listed in the 'Device combinations' section. If third-party products are used, any guarantee provided by Siemens will be invalidated.

Power supply		
Operating voltage	SAS31..	AC 230 V $\pm$ 15%
	SAS61..	AC 24 V $\pm$ 20% / DC 24 V +20% / -15% or AC 24 V class 2 (US)
