Functions

Design and Function

Figure 1: TE 5 - TE 55

General

TE 5 – TE 55 valves have an interchangeable orifice assembly.

TE 5 – TE 55 valves are built up of three main components (Parts program):

1. Thermostatic element
2. Orifice assembly
3. Valve body with connections

The orifice is refrigerant and range independent.

All valves are equipped with external pressure equalization.

2	Interchangeable orifice assembly.
3	Valve body.
4	Superheat setting spindle.
5	External pressure equalizing connection with 1/4 in / 6 mm flare nut (solder is available on TE 5).

To ensure long operating life, the valve cone and seat are made of a special alloy with particularly good wear properties.

Superheat

SS	Static superheat
OS	Opening superheat
SH	SS + OS = total superheat
Q_{nom}	Rated capacity
Q_{max}	Maximum capacity

SS can be adjusted with setting spindle. The standard factory SS setting is 4 K / 7.2 °F. The OS is 4 K / 7.2 °F from when opening begins to where the valve reaches its rated capacity Q_{nom} . OS is determined by the design and cannot be changed.

Example

Static superheat SS = 4 K / 7.2 °F

Opening superheat OS = 4 K / 7.2 °F

Total superheat SH = 4 + 4 = 8 K

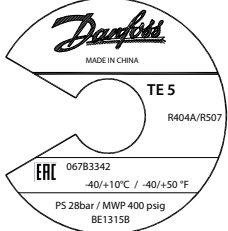

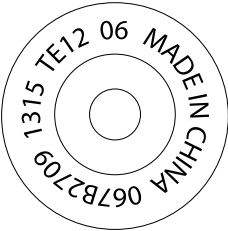

SH = 7.2 + 7.2 = 14.4 °F

Thermostatic expansion valves, Type TE 5 - TE 55

Using orifice with range B element, please check superheat under running conditions and readjust SS setting, if necessary.

Identification

Table 3: TE 5 - TE 55

Element label	Orifice assembly marking	Capillary tube tag
		

The thermostatic element is fitted with a label (on top of the diaphragm)

The label holds information like valve type, evaporating temperature range, MOP point, refrigerant, max. working pressure PS / MWP and production date.

Production place and date (BE1315B) mean:

BE = Wuqing, China

13 = Week

15 = Year 2015

B = Tuesday

Orifice assembly for TE 5 – TE 55

The orifice assembly is marked on top of the spring cup, e.g. as shown in the figure.

TE 12 = For valve type

06 = Orifice no.

067B2709 = Orifice code no. for sales order

1315 = week 13, year 2015

Capillary tube tag for TE 5 – TE 55

The label gives the orifice size (06). A new label always accompanies a new orifice assembly.
